Series of posts on HTTP status codes

Because I want to get into the habit of blogging on a regular basis, I thought it would be a fun idea to write a series of articles on one of my favourite topics: HTTP and Webservices.

To start, I began writing an article for every HTTP status code. I only realized after I drafted the first few, that the [IANA](#) page actually lists 68 official ones. Definitely a bit more than I thought, but I started and I'm going to see if I can finish it.

I'm going to release the first few this week, and then switch to a weekly schedule. Hopefully I can keep this going for a year!

Today I published the first one: [100 Continue](#).

If you're interested to read the future ones or want to show support, you can:

- [Subscribe to the Mailchip Email list](#), which I've setup for this purpose.
- [Subscribe to my RSS feed](#)
- Or just follow me on [Twitter](#).

HTTP series

This article is part of a series about the HTTP protocol. Read them all here:

- [Series of posts on HTTP status codes](#) (2018-06-27)

Informational 1xx

- [100 Continue](#) (2018-06-27)

Yea I was thinking of doing a few non-official ones. That one seems like a good choice!
